[Rationale for Methodology Change](#)

Solactive has determined that for replicability of the indices to be improved and ease of trading for implementation of future compositions, the Affected Indices will be rebalanced by implementing shares based on the weights calculated on Selection Day. This will improve user experience for all clients.

[Changes to the Index Guideline](#)

The following Methodology changes will be implemented in the following points of the Index Guideline:

3.1 ORDINARY REBALANCE

From (old version):

In order to reflect the new selection of the INDEX COMPONENTS determined on the SELECTION DAY (in accordance with Section 2.1 and 2.2) the INDEX is adjusted on the REBALANCE DAY after CLOSE OF BUSINESS.

This is carried out by implementing the shares as determined on the FIXING DAY based on the weights calculated on the SELECTION DAY.

To (new version):

In order to reflect the new selection of the INDEX COMPONENTS determined on the SELECTION DAY (in accordance with Section 2.1 and 2.2) the INDEX is adjusted on the REBALANCE DAY after CLOSE OF BUSINESS.

This is carried out by implementing the shares as determined on the FIXING DAY based on the weights calculated on the SELECTION DAY.
